YAHOO SPORTS WEAR®

Regardless of the sport, whether you play at international or entry level, FullForce Clothing teamwear is custom made for your chosen sport and tailored for your team. FullForce Clothing utilises state of the art manufacturing facilities and incorporates exclusive performance fabric technologies.

We have a dedicated distribution network and customer service team which allows us to provide a unique teamwear purchasing experience. Our involvement and understanding of team sports has enabled us to develop quality team uniforms regardless of the sport.

Major advancements in the sportswear apparel industry have been made over the past decade and FullForce Clothing Sportswear is no different. In particular, sublimated sportswear has made a real surge and you have more than likely seen sublimated gear used in most top level sports.
Sublimation is the process of using heat-sensitive inks to print graphics and text onto specific paper that is then pressed onto the fabric where the ink is converted from a solid to a gas without going through the liquid phase. This means that when the ink is bound to the fabric, it literally becomes a part of the fabric, rather than it sitting on top of it like a traditional screen print or heat transfer.

The beauty of sublimation is in its flexibility which is one of its many advantages.
You can transfer digital images directly from a computer generated design to your garment, so colours, patterns, logos, numbers, names, imagery, etc, can all be included in the one print process.

Another advantage is that minimum order quantities for sublimated garments are 10 units and lead times are 4 weeks. Minimum order quantities and lead times for other cut & sew items can vary from item to item depending on the production process involved.

Repeat orders are also quick and easy to reproduce as all information is stored electronically making the replication of garments efficient and accurate.

If you are in need of assistance with your custom design, just contact us and our designers will be more than happy to help.

DESIGN

Choose from one of our designs or submit your own and we will produce it to your requirements.

BASKETBALL

Today's custom basketball uniforms feature a wide range of technical fabrics that maximize game play and are designed to provide additional features such as breathability, strength and moisture management with wicking capabilities, odour control and excellent comfort.

The AeroMax fabric range has special fibres that are able to draw sweat away from the body by wicking it from the area of concentration to a wider area of the material. By dispersing the moisture over this larger area there is more contact with air allowing the fabric to dry quicker.

DESIGN

Cricket Pants are made from medium weight polyester. It is complimented with spandex to allow free movement stretch to the traditional hard wearing polyester material, which means they are perfect for sliding in the outfield. Like the shirts, they can be made in traditional white or sublimated to the customers' requirements. These are offered fully sublimated or with breathable mesh panels sewn in complimented with flat Lock or 3D stitching detail. We can supply cricket pants to you without the legs being hemmed so that your players can adjust them to best suit their own requirements. We can manufacture cricket tops and pants produced from our patterns and incorporate your design and logos.

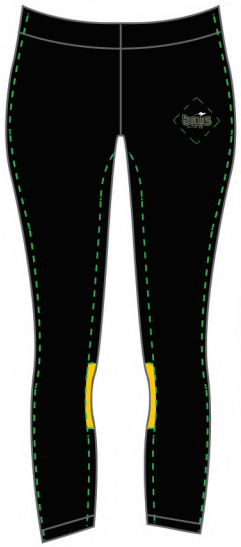

ATHLETICS

High performance training wear which improves body stability and posture, while reducing muscle vibration through high compression. Strategically placed Thermoplastic Polyurethane (TPU) Power bands work with the body to store energy which would normally be lost, and returns this to simplify explosive movements. A full range of athletics uniforms custom made in your club, team or regional colours. All styles offered in ladies and men's cuts.

CYCLING - BIB

FEATURES

1. Lycra material.
2. Elastic Interface.
3. Reflective detailing.
4. Mesh bib straps.
5. Silicone leg gripper.

ORDER CODE
JP158BS

INFORMATION

This set of cycling bib shorts combine a flexible fit and breathable surface to craft a comfortable cycling accessory that help to drive performance.

The bib shorts are constructed using Lycra, which offers a fully flexible design allowing a wide range of movement when riding, granting an exceptionally comfortable fit that is supportive without being restrictive.

This design is further bolstered by the addition of 'Elastic Interface', a padding system integrated within the base of the bib shorts that grants an unequalled level of comfort. Together with silicon elastic leg cuffing and moisture wicking fabrics this garment is really easy to justify.

TOUCH

Moisture is transported in textiles through capillary action or wicking. (AeroMax) In textiles, the spaces between the fibres effectively form tubes, which act as capillaries, and transport the moisture away from the surface.

As a rule, the narrower the spaces between the fibres in a fabric, the more effectively they will draw up moisture. For this reason, fabrics with many narrow capillaries, such as polyester microfibres, are ideal for sports such as touch.

INFORMATION

Our Touch Uniforms are innovative and stylish, produced from performance polyester mesh. Breathable and soft-touch treated.

We can supply custom made touch tops and shorts from the same fabric or use poly / cotton drill for the shorts.

CUSTOM BRANDING

Design/Artwork

Have a great idea for a design but no idea how to produce it?
Let our experienced team take care of that for you, all you need to do is provide us with a sketch or instructions and we can develop for you.

Printing

We prefer to receive your artwork in the following vector formats
Corel Draw – .cdr
Versions up to X6 and fonts should be converted to curves
Illustrator – .ai or .eps
Versions up to CS6 and fonts should be converted to outlines

Embroidery

Vector Files: .cdr, .ai, .eps
Raster Files: .jpeg/.jpg, .gif, .png, .bmp, .tif, .pdf

NAMES/NUMBERS

These are great when every garment needs a different name or number, also a great option for application on nylon jackets, bags etc.

We have a large range of colours and fonts for you to choose from. Custom Fonts and numbers are available on request.

We offer a full embroidery service.

We can embroider your logo, or name in almost any size, colour and place on your garment or product. We use the latest machinery with the capacity to embroider 36 garments at any one time. We pride ourselves on being able to do large volumes with quick turnarounds.
